Project Navigation.

This project has three files: Project_3.pdf, Database_Queries.pdf, and Project_3.db.

- Project_3.pdf Visualizes all 4 tables and defines their primary and foreign keys. Explanations of every field are given as well as a database schema.

- Project_3.db is an SQLite3 database and is populated with the same data that is in the tables of Project_3.pdf and is what I used to test my queries on.

- Database_Queries.pdf contains queries that I used to both build the database and also 3 queries of that database.
